## 1. Introduction

Thank you for choosing a Daray MAGW150 Wood's light.

The MAGW150 is specifically designed to meet the demanding needs of today's dermatologists and skin clinicians whilst providing the finest quality design with superior performance, reliability and value. The MAGW150 emits Ultraviolet light with the ability to note minor skin colour changes and variations in skin tone.

Under UV light different substances become luminous when exposed, making it a useful tool for forensic technicians, veterinary surgeons, dermatologists and many more.

This user & operation guide contains all the information you need for installation, operation and maintenance.

### 2.2 Pre-Start Checks & Powering On

Please check that the power cable (when applicable) is without visible damage, harsh folds, knots or cuts in the rubberised coating

Check that the plug is fully inserted into the wall socket and then switch the power on. The MAGW150 uses a single button on the top of the head to power the light on and off.

## 3. Installation

### 3.1 Operation

To use the handheld version of the MAGW150 you will need to locate a power socket within range of your examination point, plug the light into your desired location then:

1. Open the protective cover plate

2. Reduce light in the room to a minimum
3. Turn the Wood's light on with the switch
4. Allow the light to warm up for about a minute
5. When finished, turn off and close the protective cover plate to protect the viewing magnifier.

### 3.1 Power Requirements

The power supply for the MAGW150 is a standard mains plug that leads into the light's body. These can be inserted into any standard UK wall socket and accepts 110-240V.

The light can now be tested by applying power and pressing the switch on the head.

To gain full support of our warranty please contact DARAY by phone or email.

Daray also provide service plans to help you maintain your light.

Contact Daray on **0800 878 9864** for more details.

**For any issues requiring service work on the MAGW150 please contact DARAY, as unauthorised work will invalidate the warranty.**

## 4. Maintenance

The proposed maintenance is only a suggestion. Depending on the use of the product and the operating environment, this may need to be revised more often.

If you cannot resolve a problem or if the equipment is not operating as desired, then please contact our helpline on **0800 878 9864** or email **support@daray.co.uk**

### 4.1 Maintenance schedule

<b>Weekly checks should include:-</b>	No visible signs of excessive wear.
<b>Monthly checks to include:-</b>	Check all electrical connections are sound and that there is no visible cable wear.
<b>Six monthly checks to include:-</b>	All fixings to be checked and be of sound construction.

### 4.2 Safety Precautions

- For all cleaning work, power off the equipment and where possible unplug the mains socket, only minimal cleaning fluids should be used.
- Please do not look directly into the light source when illuminated.
- If the equipment is dented or scratched this should not impact the usability of our lights however we advise that if the BioProtect® coating is damaged and the metal casing underneath is visible, please do not attempt to ‘paint’ over it as this will impact upon the effectiveness of the coating, simply use an alcohol based cleaning spray when cleaning and pay special attention to the cut.

If there is damage to the power cable or if exposed wire is visible  
**DO NOT USE**

### 4.3 Bulb Replacement

The MAGW150 may need to have its bulb replaced during the lifetime of the light. To remove the bulb please follow these instructions.

**Do not use undue force when replacing lamps, as it may shatter causing injury.**

**Ensure the Wood's light is disconnected from mains before replacing lamps.**

Remove the crosshead screw from the lamp protection cover, the screw should remain attached to the cover to prevent it being lost.

Expose the lamp below by lifting the lamp protection cover and sliding it out of the retaining slot.

**NOTE:** There is a wire thread keeping the cover attached to the main unit of the light, be careful not to snap the cover when replacing the lamp.

Remove the lamp by pulling it out of the fitting.

Align the pins at the end of the lamp with the slots in the fitting

#### 4.4 Cleaning

**Do not use strong chemical cleaning agents or any abrasive materials to clean the light. The light is not waterproof so the use of excessive amounts of cleaning fluids could cause serious harm or injury.**

We advise that the light should only be dusted with a soft flannel cloth, and the lens gently cleaned with an alcohol-based liquid (aerosol) spray, and wiped dry.

## 5. Troubleshooting Guide

Problem	Possible Cause	Corrective Actions
<b>No light output</b>	Power Supply	Check that the selected socket is under power and the power is switched on at all relevant points
	On/Off Button	Press the button on the back of the light to check if the light will power on (if dimmed refer to poor light output actions).
	Fuses	Visually check fuses then check continuity with meter
	Cables	Please disconnect the device from the mains before checking the visible wiring for any damage, if any damage is present <b>DO NOT USE</b>
<b>Poor Light output</b>	Voltage out	Verify correct secondary voltage (please contact Daray for nominal voltage under load).
	Voltage in	Verify that the correct mains voltage and correct transformer is being used
